Professional Summary

MERN Stack Developer with 3+ years of experience in building scalable web applications using React.js, Node.js, Express.js, MongoDB, and MySQL. Experienced in developing RESTful APIs, implementing JWT-based authentication, and integrating backend services with React frontends. Hands-on exposure to Docker-based development and AWS cloud services with strong understanding of SQL and NoSQL databases.

Technical Skills (Tools & Technologies)

Programming & Backend: JavaScript (ES6+), Node.js, Express.js, Razorpay Payment Gateway Integration, Redis

Frontend: React.js, HTML5, CSS3, Tailwind CSS

API & Security: RESTful APIs, JWT Authentication, Role-Based Access Control

Databases: MongoDB (NoSQL), MySQL (SQL)

DevOps & Cloud: Docker, AWS EC2, AWS S3

Core CS & Programming: Data Structures and Algorithms, C++, Java (Basic)

Tools & Platforms: Git, GitHub, Postman, VS Code

Operating Systems: Linux, Windows

Certifications

- [AWS Certified Solutions Architect – Associate](#)
- [AWS Certified Developer - Associate](#)

Professional Experience

MERN Stack / Node.js Developer

TCS | Jan 2025 – Present

- Designed and developed scalable RESTful APIs using Node.js and Express.js
- Implemented JWT-based authentication and role-based authorization
- Built and optimized MongoDB and MySQL database operations
- Integrated backend services with React.js frontend
- Used Docker for containerized development workflows
- Executed API testing and backend debugging using Postman
- Collaborated in Agile environment using Git and GitHub

Node.js Developer

Engineering Services International | Oct 2023 – Dec 2024

- Built backend services using Node.js, Express.js, and MongoDB
- Created REST APIs and handled backend business logic
- Handled database CRUD operations and backend bug fixing
- API testing using Postman

Projects

Internal Order & Service Management System (*Team Project*)

Tech: React.js, Node.js, Express.js, MongoDB, Docker, AWS (EC2, S3)

- Designed RESTful APIs for order and service request workflows
- Implemented JWT-based authentication and request status tracking
- Designed and optimized MongoDB schemas and CRUD operations
- Integrated backend APIs with React.js frontend components
- Used Docker for containerized development and deployed on AWS EC2

Xcite – eCommerce Platform (*Team Project*)

Tech: React.js, Node.js, Express.js, MongoDB, Tailwind CSS

- Built REST APIs for products, users, cart, and orders
- Implemented MongoDB and MySQL database operations (SQL & NoSQL)
- Integrated React frontend features such as search, pagination, and checkout flow
- Performed API testing and backend debugging using Postman.
- Improved performance by implementing pagination and indexing techniques.

Achievements

- Secured All India Rank 270 in NIMCET (National Institute of Technology MCA Common Entrance Test).
- Served as Network Systems Lab Administrator at NIT Calicut, managing lab systems.

Education

- **National Institute of Technology, Calicut**
Master of Computer Applications (MCA) — CGPA: 7.72
 2021 – July 2024
- **Government Holkar Science College, Indore**
Bachelor of Computer Applications (BCA) — Percentage: 70.7%
 2017 – 2020
